# UNCERTAIN TIMES CALLS FOR CERTAIN MEASURES...

Over the last 18 months our schools have been facing a variety of challenges moving to at home and on-line learning. With restrictions changing almost daily, the struggles of delivering on-line learning and maintaining community and parent engagement has become even more difficult.

With graduation and end of year award ceremonies fast approaching, now is the time to prepare for reengaging students, parents, grandparents, relatives and the broader community in these important events.

Over the past 10 years, LifeLike's experienced technicians have been privileged to design and provide production solutions for schools, charities, councils, and government offices, delivering integrated and Live Production services to deliver and stream their meetings and presentations to their staff, parents and wider communities both locally and around the world.

We have been proud to work with the Hunter Principal's ConnectED Conference, St Joseph's College Hunters Hill, Rutherford Technology High School, St George Christian School, Glendale Technology High School, Woollahra Municipal Council, The Children's Hospital Westmead & The Sydney Children's Hospital Foundation, Starlight Children's Foundation, Port Stephens Council, Singleton Council, Hurlstone Agricultural College, Waverley College and many more...

## SOLUTIONS
